Welcome to

PRIORIFY AI

Prioritized Stakeholder Intelligence

Priorify®

At **Priorify®**, we understand the challenges leaders face when it comes to managing visions, objectives, and projects. With the overwhelming volume of information and tasks in today's political and economic landscape, the need for effective prioritization and unity has never been more critical. That's where Priorify brings value.

OVERVIEW

Priorify, serves clients by:

1. Formulating a project mission statement with the **Executive Management** team.
2. Gathering insights from **Selected Stakeholders** through confidential interviews
3. Presenting insights in a cause-and-effect **Validation Diagram** (see Figure 1 on page 2).
4. **Stakeholder Ratings** of the diagram produce a PriorityPath, which illuminates your organizations top priorities.
5. Aligning your organization on a plan of **Action,** leading to sustainable success.

Priorify's process and technology is industry, discipline, and application agnostic, meaning it can be applied to any type of company, entity, organization, or group. Examples of past client applications include: new customer acquisition, product launches, strategic planning, organizational restructuring, manufacturing improvements, operations, quality, productivity, profitability, conflict resolution, resource and capital allocation, mergers and acquisitions, downsizing, project design and management, safety (OSHA), and security. For a detailed list please reference the book: ***Finding the Priority Path, Stringham and Stephens, 2005, 67,109, 116.***

PriorityPath empowers leaders to capture the wisdom of seldom listened-to stakeholders who have insights about your organization's most challenging problems and greatest opportunities. This internal & external intelligence identifies cost-saving and revenue enhancing measures which your organization could profitably harness.

Once a leader experiences the detailed insights and value produced by a PriorityPath project, they often find themselves thinking:

"Let's get this Priorified®"

1. Executive Management

2. Stakeholder Selection

3. The Validation Diagram

4. Stakeholder Ratings

5. Insights & Actions

See more about our 5-step PriorityPath Process on page 4

STAKEHOLDERS CONFIRM THE VALIDATION DIAGRAM

"All of us know more than any one of us."[1]

Wise leaders know that priceless wisdom exists at all levels within and outside their organization. Harnessing that wisdom can minimize resisting forces and unleash driving forces. High-priced consulting companies cannot compete with ***the transformative power of prioritized stakeholder intelligence***.

Stakeholders are individuals inside or outside your company who:

- can affect your business
- are affected by your business, and/or
- have insights into your business and operations

Executives should engage their stakeholders frequently to capture their intelligence. Stakeholders have insights regarding how to control or eliminate resisting forces, however, few leaders seek these insights and organize them (see Figure 1 below).

Priorify's technology can produce stratifications which highlight the differences in ratings by various groups. It is vitally important to understand the mindsets of various rating groups[2] and have dialogue about their rating rationality. To facilitate this conversation, we ask stakeholders the following questions:

1. What should we be doing that we are not now doing, and why?

2. What problems now exist that must be resolved if we want to accomplish this project's mission?

3. What potential problems may surface as we take action to accomplish this project's mission?

This dialogue, combined with PriorityPath's technology, unifies and motivates stakeholders to accept the "combined" stratification for remedial plans of action.

Figure 1. A Validation Diagram, illuminates cause-and-effect relationships and is approved by stakeholders for accuracy.

Once clients experience this unifying result, they often want to "priorify" all aspects of their organization, including measures of sustainable profitability, operational excellence, and building a unified company culture of action.

---

2. **Love Your Enemies,** Brooks, Arthur C., Harper Collins, 2019, 183.

HOW DO STAKEHOLDERS RATE THE DATA ON THE VALIDATION DIAGRAM?

After the stakeholders have approved the Validation Diagram, that information is transferred to a secure website in the cloud. All stakeholders receive a secure login link. Following prompts, participants identify their department and role, but not their name. This information enables segmentation of various stakeholder groups, but does not violate anonymity.

Final recommendations are fully dependent on stakeholder ratings of each data node (see Figure 2 below). These anonymous ratings produce a Strategic Event Value (SEV) for each data node, which drives PriorityPath's data driven recommendations.

Each data node is rated on some or all of the following criteria:

JUDGEMENT	QUESTIONS	RATINGS
Importance	How much does this issue currently affect you and/or is it likely to affect you in the future if it is not appropriately addressed or resolved?	0: The issue does not need to be addressed 1: Not important 2: Minimally important 3: Moderately important 4: Important 5: Highly important
Familiarity	How familiar are you with the issue?	Low: Unfamiliar with the issue Medium: Somewhat familiar High: Very familiar
Frequency	How often does the issue occur OR how often could it occur?	Low: Seldom Medium: Periodically High: Regularly
Remediation	What would be the level of effort to eliminate or moderate the issue?	Low: Minimal effort Medium: Moderate effort High: Extensive effort

Figure 2. Rating Criteria used in a PriorityPath Project.

As stakeholders review the ratings, a paradigm shifting and mindset changing experience occurs that unifies stakeholders. All participants will see how their feedback illuminated insights pertaining to the project that others were not aware of before, and also see how other's feedback did the same for them. This process effectively aligns stakeholders as answers to the following questions become clear:

1. What does someone else know that I don't know?

2. What do I know that someone else does not know?

SUMMARY OF THE PRIORITYPATH PROCESS

There are ***Five Critical Components*** to a PriorityPath project:

1. Executive Management

Executive management, guided by Priorify personnel, prepare a ***project mission statement.*** This mission statement clarifies the purpose of the project and specifies the issues that management wants Priorify personnel to address.

---

2. Stakeholder Selection

Stakeholder selection is crucial for the success of a PriorityPath project. Executives should carefully ***select internal & external stakeholders who possess valuable insights, regardless of their title, longevity, or popularity.*** Stakeholder involvement fosters loyalty, ownership, and commitment to resolving issues, ensuring the project's long-term success.

---

3. The Validation Diagram

Stakeholder insights are gathered through confidential interviews that focus on identifying resisting forces. ***Priorify personnel create a cause-and-effect horizontal tree diagram, called the Validation Diagram,*** which is validated by the stakeholders for accuracy and completeness.

---

4. Stakeholder Ratings

Stakeholders rate each node on the tree diagram based on importance, familiarity, frequency, and effort to fix. ***Ratings are processed using algorithms that calculate a Strategic Event Value (SEV) for each node on the tree diagram.*** SEVs are statistically Normalized Ordinal Probabilities which highlight issues by degree of severity.

---

5. Insights & Actions

The culmination of this process ***produces a PriorityPath, which highlights key issues and facilitates unifying discussion among stakeholder groups.*** Remediation teams then develop unified action plans.

HOW HAS PRIORIFY IMPACTED CLIENTS AND THEIR BUSINESSES?

Here's what client's have said about Priorify's value and impact:

"[Priorify] ...reliably performs the work they are contracted to do. Comparing profiles of priority among key individuals and major groups permits creative strategy development that is unique. My decision to use them (repeatedly) is based on my experience that their analytical system produces actionable results in ways that I have not experienced with any other analytical approach."
- Gary Holden, Former Chairman and CEO, EnSource Industries, President AltaGas

"The final product was so well documented that there was absolutely no argument from any party about the findings."
- Dr. J.D. Harder, Board Member, Canadian Food Grains Bank

"Relentless identification and mitigation of internal and external resisting forces in any endeavor enables driving forces to naturally flourish and rapidly advance success."
- Skip L. Holland, Senior Vice President, MWH

"The challenge of competing priorities and personal agendas are systematically addressed leading to successful accomplishment of critical mission outcomes. The process provides a roadmap to achieving mission-critical outcomes which appear at first to be unsolvable."
- Bruno Petrenas, City Engineer, Tauranga, New Zealand

"PriorityPath was used...in the preparation of a strategic plan...for shared services delivery. Involving over 1,000 stakeholders, it provided an objective assessment of the barriers to implementation, clearly separating fact from perception. It accomplished in weeks what would otherwise have taken months, clearing the way for getting on with the rest of the job. Results continue to guide our efforts a year later."
- Per Anderson, Executive Director Business Strategy, Alberta Corporate Service Center, Government of Alberta, Canada

RESEARCH BEHIND PRIORIFY'S PROCESS

Priorify's process specializes in identifying, prioritizing, and controlling critical resisting forces.[3] It also helps organizations identify critical driving forces that are not producing their intended impact. Our process identifies known and potential problems, risks, deficiencies, and every issue preventing the organization from achieving its desired future state. As a result, the strengths of the resisting forces are weakened by focused remedial action, making it possible for the driving forces to move the organization forward as planned.

HAS PRIORITYPATH BEEN VALIDATED BY 3RD PARTY ORGANIZATIONS?

Yes, Priorify's technology has been subjected to rigorous independent evaluations by the following organizations:

- U.S. Army Training and Doctrine Command (TRADOC): TRADOC evaluated PriorityPath against alternative prioritization methods and found it to be the only option that mathematically considers interactions among issues, producing an integrated priority path.

- Former U.S. Nuclear Regulatory Agency Fault Tree Analysis Project Leader: The Nuclear Utilities Service Corporation commissioned an independent evaluation of PriorityPath by a former U.S. Nuclear Regulatory Agency Fault Tree Analysis Project Leader, resulting in a contract for a highly sensitive PriorityPath project.

- Esso Resources (ExxonMobil): Esso Resources validated PriorityPath's mathematical formulations and subsequently engaged in a PriorityPath project to prioritize operations in the Arctic Ocean. This validation led to eight PriorityPath projects for Esso Resources' partner, Syncrude Consortium.

- Stanford Research Institute (SRI): SRI conducted a technical evaluation of PriorityPath for the U.S. Bureau of Indian Affairs, which subsequently contracted for several PriorityPath projects.

- U.S. Veterans Administration (VA): The VA's Medical Division had PriorityPath's algorithms evaluated by independent experts, and several VA hospitals used PriorityPath for accreditation.

IS PRIORIFY'S TECHNOLOGY APPLICABLE TO DIVERSE INDUSTRIES?

Yes, below is a partial client list. Many more industries and clients are referenced in the book:
Finding the Priority Path, Stringham and Stephens, 2005, 67,109-174.

Corporations

- ***Aerospace and Defense:*** Boeing, Lockheed Martin, Sikorsky Helicopters
- ***Energy:*** Amoco, BP, Chevron, ExxonMobil, Royal Dutch Shell
- ***Manufacturing:*** General Electric, Honeywell, 3M, Procter & Gamble
- ***Technology:*** AT&T, IBM, Microsoft, Oracle

Government & Military

- ***United States:*** Exec. Office of the President, Departments of: Defense, Interior, Agriculture, Energy, Homeland Security, VA, Indian Affairs, NASA, Navy, Army
- ***Canada Governments:*** Federal, State, Provincial, Local, Schools (34 diverse projects, all referenced in the book)
- ***New Zealand:*** Department of Defense, Ministry of Health
- ***Australia:*** Department of Defence, Queensland Government
- ***United Kingdom:*** Ministry of Defence
- ***Military:*** U.S. Army Deep Battle Plans, M1A1 Abrams Tank, Army Space Initiative, New Zealand Defense Forces

Petrochemicals

- Achieving Rated Capacity
- Proj. Mgmt. Priorities
- Environmental Mgmt.
- Plant Expansion
- Caisson Recovery
- Loss / Safety Mgmt.

Healthcare

- Mayo Clinic
- VA Hospitals
- Kaiser Permanente
- MultiCare Health System
- Virginia Mason Hospital
- Intermountain Health
- Saint Patrick Hospital
- Grinnel General Hospital
- Sullivan/Luallin Group
- Sutter Health System

Utilities - Water, Power, Engineering

- MWH / Southern Water
- Southern Company
- Southern Cal. Edison
- Nuclear Util. Serv. Corp.
- Hong Kong Tunnel
- Sydney Water Board
- New Zealand Electric
- Australia - Hydro Tasmania

UNLOCKING HIDDEN POTENTIAL WITH PRIORIFY

In today's dynamic business landscape, organizations are seeking ways to optimize their operations, enhance productivity, and achieve sustainable growth. PriorityPath offers a unique approach to achieving these goals by harnessing the collective wisdom of your organization's stakeholders.

Through a proven and unbiased process, PriorityPath uncovers hidden opportunities, identifies critical challenges, and prioritizes strategic actions that empower organizations to make informed decisions that drive success. By fostering collaboration, eliminating fear of reprisal, and providing a platform for diverse perspectives, PriorityPath creates a culture of innovation and empowers employees to contribute their best toward unified company plans and strategies.

By engaging in a PriorityPath project, your organization can expect to:

- Empower your people, prioritize your actions, and unlock hidden potential
- Unify stakeholders to eliminate resisting forces and unleash driving forces
- Identify the key issues and opportunities within your organization
- Prioritize capital and resource allocation to maximize impact
- Expose faulty assumptions and enable quality decisions based on vetted information
- Streamline processes, eliminate non-productive activities, and achieve cost savings
- Uncover hidden talents and foster a culture of open communication
- Enhance teamwork, improve morale, and boost unified employee engagement
- Produce insights needed to set your organization on the best path to sustainable success.
- Gain confidence and comfort knowing that your company strategy, project, or initiative, has been **Priorified®**

Embark on your PriorityPath journey today and experience the transformative power of prioritized stakeholder intelligence.
